REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose, in combination with all the limitations and in light of the specifications that the method and generator system uses a first locked loop with a first bandwidth to estimate a first phase angle and a second locked loop having a second bandwidth greater than the first bandwidth for estimating a second phase angle and calculating a phase shift between the first and second phase angles and determining if the generator system is within a generation island based on the calculated phase shift.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
